Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on 11-27-01 (Preliminary Amendment)
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

This is a divisional application of 09/ 420,347 filed on 10-19-99.

The preliminary amendment of 11-27-01 has been entered. Accordingly, claims 3-6, 8-15, 17, 19-22, 25, 34, 35, 37-42, and 45-49 are now cancelled. Thus, only claims 1, 2, 7, 16, 18, 23, 24, 26-33, 36, 43, 44 remain for consideration along with new claims 50-54.

Specification

1. **Title:** The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: **Tricyclic Compounds As PPRP Modulators.**

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. **Scope of Enablement:** Claims 1, 2, 7, 16, 18, 23, 24, 26-28, 30-33, 36, 43, 44, and 50-54 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the preparation and use of compounds of formula (Ia) with Ar as phenyl, does not reasonably provide enablement for the preparation and use of compounds of formula (Ia) with Ar as another ring or ring system. The specification does not enable any person skilled in the art to

Art Unit: 1624

which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. The schematic reactions on pages 28-31 briefly describe how 'Ar' can be attached to the tricyclic system. However, there is no description on how the starting material of HQ-Ar-R can be obtained. The state of the art, Lohray et. al. (WO 99/19313), shows related compounds with 'Ar' as either phenyl or benzofuranyl. Thus, with no starting material disclosed and limited teaching in the art, one skilled in the art would have to carry out undue experimentation to make compounds of formula (Ia) with Ar as another ring or ring system. Furthermore, it appears that no compound was tested for activity. So, with only bioassay method described, one skilled in the art will have to research extensively with the large number of compounds claimed herein to find out which compounds actually can modulate PPAR and treat diabetes.

Claim Objections

3. Claims 29 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Cited References

4. References cited on form PTO-892 show related compounds. However, they do not read on the instant claims because the disclosed compounds do not have a substituent corresponding to side chain of the instant formula (Ia).
